	1	Tag 2 or 3 removable stubs (15/16 mm each) Baggage tag (length acc. customer specification) Claim tag (length acc. customer specification)		f: 1, 2 or 3 colours r: 1 colour
Numbering	Tag: Front side: not numbered Claim Tag: Reverse side: not numbered			
Finishing	1 x perforated			
Packing	250 tags per roll, 4 rolls per cardboard box, each box one labelled with contents			

BARTSCH also offers Baggage Tags with integrated RFID chips

RFID baggage tags offer several advantages over conventional baggage tags, including but not limited to:

-  Cost saving (please ask for a life cycle cost comparison between a conventional barcode and RFID)
-  Maintenance: less down time of your baggage claim system
-  Happier travellers due to greatly reduced lost baggage and reduced waiting time at the baggage claim
-  Faster transitions and thus increased airport capacity

Bag tags meet all relevant norms such as IATA R 740, RP 1740, ISO 18000-6C, ISO 18046
